Re: November 1, 2006 Notification Regarding Self-implementing On-Site Cleanup and Disposal of Polychlorinated Biphenyl Remediation Waste at PCB Site Building 386 AL#01 in Investigation Area C2, Eastern Early Transfer Parcel, Lennar Mare Island, Vallejo CA

Dear Mr. Farley:

Following our November 16, 2006 site inspection of the above referenced PCB site, we are unable to determine exactly where the PCB samples were collected from this building, or the location of the 18 areas proposed for excavation. We are therefore unable at this time to make a determination of the adequacy of the proposed cleanup action. As we discussed on November 16, we will withhold a determination on this action until after you have gone back through your records to identify the sample locations within the building. We will reschedule another site visit to reassess the adequacy of characterization of the building at that time.

If you have any questions about this letter, please call me at (415) 972-3150.

Sincerely,

A handwritten signature in black ink, which appears to read "Carolyn d'Almeida", is positioned above the typed name.

Carolyn d'Almeida
